

SAVE WITH REPRICING INSIGHTS™

Our out-of-network repricing service is fully in-house for better efficiency, more transparency and better savings.

Even with the best plan language and member support in place, out-of-network claims happen. With our process and methodologies in place, **our clients have seen an average savings of up to 60% on their out-of-network claims.**

THE JOURNEY OF AN OUT-OF-NETWORK CLAIM

WITH MARPAI

- We work with you to define strong plan language around repricing, networks and access.
- An out-of-network claim comes to Marpai.
- The claim is assigned to one of our in-house reimbursement specialists.
- The reimbursement specialist uses our proprietary repricing platform to examine the claim and understand any geographic pricing information. They will also look at:
 - The plan's preferred out-of-network repricing language
 - Local provider billing practices and financials
 - Patterns regarding member education about in-network options with the plan
- The reimbursement specialist may also coordinate with other teams, like clinical care management and client engagement, to better understand your needs and the necessity of the claim.
- The reimbursement specialist documents and reprices the claim using your plan language alongside our standard and proprietary methodologies including:
 - Negotiated provider agreements
 - Supplemental networks
 - Medicare and Cost Plus
 - Billing and coding audits
- Our repricing team provides post-payment support including:
 - Appeal responses
 - Documented and custom client and member communication
 - Dispute resolution, including balance bills and single-case agreement negotiations

WITH THE OTHER TPAs

- You choose an off-the-shelf cookie cutter plan with little-to-no room for customization.
- An out-of-network claim comes to the TPA or carrier and is sent to a third-party repricer.
- The claim is auto-adjudicated according to plan language.
- The member is balance billed if the provider doesn't like the reimbursement.

DITCH THE AUTOPILOT

We've got your back with cost management strategies designed around your needs.
